WORK EXPERIENCE

Software Engineer
AdroitSoft India Pvt. Ltd.

04/2024 - Present   *Chennai (Remote)*

Key Contributions :

▫ Led the end-to-end implementation of hospital management software using MediSteer and Curengine across multiple healthcare facilities, including requirement analysis, environment setup, data migration, and deployment, ensuring projects were completed on time and met quality standards.

▫ Provided prompt and effective technical support to end-users, troubleshooting software issues, guiding staff through problem resolution, and ensuring high customer satisfaction and minimal disruption to hospital operations.

▫ Designed and developed responsive JSP-based user interfaces integrated with Java Servlets, enabling dynamic data handling and interaction with PostgreSQL databases for secure storage and retrieval of patient and hospital records.

▫ Utilized iReport tools to design and generate comprehensive JasperReports, creating detailed and insightful reports for hospital management to improve data-driven decision-making and operational efficiency.

▫ Conducted application demonstrations, workshops, and training sessions for hospital staff and potential clients, clearly explaining software functionality, workflows, and best practices to improve user adoption and confidence.

▫ Collaborated closely with cross-functional teams to identify, report, and resolve software bugs, implement enhancements, and ensure smooth deployment and maintenance of hospital management software, optimizing workflow efficiency and system reliability.
